TOMO

FIELD ADJ.

Elegance that's affordable.
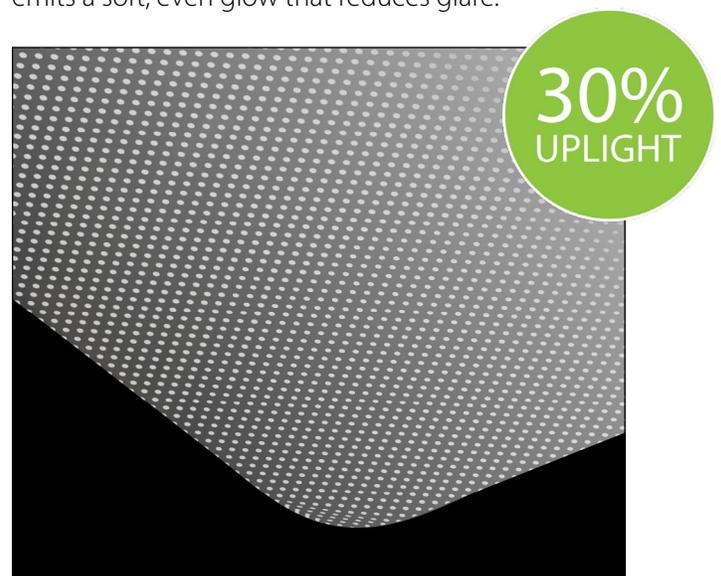

TOMO linear lighting, now with wall mount options.

A marriage of form and function.

The TOMO was designed to combine the performance of standard wraps with the architectural appeal of high-end linear lighting—all with an affordable price. Available in three lengths, the TOMO provides both field-adjustable wattage and CCT. The sleek TOMO design is ideal for use in schools, offices, or institutions that need a contemporary low-glare look with the added convenience of uplight.

Things are looking up.

TOMO's "wing" lenses boast a dot-matrix pattern that allows the fixture to deliver 30% uplight, much like a conventional wrap. The edge-lit light provides a contemporary look and emits a soft, even glow that reduces glare.

30% UPLIGHT

5000K

Lightcloud® Blue enabled.

All models of the TOMO are available with the following integrated options:
• Standard PIR Sensor
• Lightcloud PIR Sensor
• Lightcloud Blue PIR Sensor
• Lightcloud Blue MVS Sensor
• Lightcloud Controller
• Battery Backup

LIGHTCLOUD CONTROLLER   PIR SENSOR   BATTERY BACKUP

We've got connections.

Continuous-run mounting is a breeze with secure, quick-connect adapters for suspended or surface mounting (*sold separately*). Just wire the first fixture in the run and connect the rest!

TOMO CONNECT (*Suspended Mount*)
TOMO CONNECT-SM (*Surface Mount*)

Mounting options.

The TOMO comes standard with two mounting accessories: aircraft cable for secure, suspended mounts and a stainless bracket for easy mounting to junction boxes.

Stainless Bracket

Suspended Mount
Two 120" cables included

Wall mounting options.

All three TOMO lengths are now also available as a wall mounted fixture.
